

Intermediate Report about Practical Course Activities

Katjana Kosic

- Testing of PRs

So far, I have tested 72 pull requests in the ls1intum/Artemis GitHub repository. Here, you can see a list of some of the tested PRs:

Reviewed 31 pull requests in 1 repository	
ls1intum/Artemis	
31 pull requests	
[Feature] Empty Programming Exercises	May 29
Update dependencies: Webpack 5, Angular 12, Rxjs 7.1, Bootstrap 5, Typescript 4.2, Spring Boot 2.5.0	May 27
[Feature] delete results	May 26
[Bugfix] Fix C Jenkinsfile	May 26
Remove the legacy popup when deleting a submission	May 22
[Enhancement] - Allow score type change in quiz re-evaluation	May 22
[Feature] Add build logs on new result for Jenkins	May 21
Set grading instruction for UML element feedback on assessment	May 18
[Bugfix] No Learning Goal Progress Overview for Instructors	May 18
[Bugfix] Add missing brace to Scores export button	May 18
[Feature] Allow structured grading instructions editable after first usage	May 17
[Bugfix] Do not update score if the test weight is zero	May 17
[Bugfix] Removing quiz action buttons for editor	May 17
[Bugfix] - Fix Button colors in exercise detail instructor actions	May 15
[Bugfix] Displaying programming exercise grading actions to instructors	May 13
[Refactor] refactoring TextAssessmentResource	May 11
Fix errors when the exercise of the exercise details header is undefined	May 11
[Enhancement] - Improve Detail View Performance	May 11

Most of the tested PRs were Artemis functionality testing, like #3470 Webpack5, which was one of the most intense and important PRs I've tested so far. It required testing of the whole Artemis functionality and the review of visual bugs, which I reported.

- Creation of my first Bug Issue #3352

During the creation and review of modeling exercises on Artemis I encountered a bug, which made it difficult to save the example submission assessments for the respective exercise. This made it difficult for tutors to understand the grading of the example submissions, which was not saved at this point, when starting to assess recently released student submissions. The bug was due to a button called "Update Submission", which basically erased the newly created or updated example submission assessments, after clicking it. Since I encountered this issue a few times when creating modeling exercises, I decided to take over this responsibility and fix it with Jamal, one of the Artemis developers. After explaining the main problem to him, he managed to fix the bug. This problem is now resolved and the assessment of example submissions for modeling exercises is working properly again.
